

I live in an area where we have only two major newspapers and the media is controled by dripping liberals on both newspapers. There is no alternative other than listening to the radio or watching certain programs on TV. I would not want the dripping liberals to obtain control of the radio media, as well as the newspapers. The major TV news and programming is already controlled by liberal eletists, which is a major problem in obtaining balanced news, so please do not allow this to get worse. Do not change the FCC rules to allow corporate takeover, but change the rules to require more diversity of ownership than presently exists.

Sincerely,

James Paxton
